

PHARMACEUTICAL COMPLAINT REPORT

Document ID: CMP-2024-0058 | Date Issued: 18 March 2024 | Classification: CONFIDENTIAL

1. Complaint Source & Customer Information

Complaint Source	National Drug Store — Franchise Outlet
Customer Name	National Drug Store, Andheri West
Customer Address	Shop 7, Link Road, Andheri West, Mumbai – 400053
Contact Person	Ms. Sunita Patil, Store Manager
Contact Phone	+91-98201-44572
Complaint Date	15 March 2024

2. Product & Batch Identification

Product Name	Metformin Hydrochloride Tablets
Strength on Label	850 mg ← INCORRECT
Actual Strength	500 mg (per QC certificate of analysis)
Dosage Form	Film-Coated Tablets
Batch / Lot Number	MET240203
Manufacturing Date	01 February 2024
Expiry Date	31 January 2026
Pack Size	10 × 10 tablets (blister)
Quantity Affected	1,000 tablets — full batch at this outlet

3. Complaint Description

LABELING MIX-UP — INCORRECT STRENGTH PRINTED

The store manager noticed a discrepancy between the printed label strength (850 mg) and the Certificate of Analysis accompanying the shipment (500 mg). This was identified when a patient's prescription was being cross-checked.

The label on the outer carton and individual blister packs both state **Metformin 850 mg**. However, the batch manufacturing record and CoA clearly indicate these are **Metformin 500 mg** tablets. Tablet dimensions and physical appearance are consistent with the 500 mg variant.

No patients have consumed incorrectly labelled product (caught at dispensing stage). The full stock (1,000 tablets) has been removed from sale.

4. Initial Assessment

Complaint Type	Labeling — Incorrect Strength
Severity (Initial)	Critical
Priority	Urgent
Patient Risk	HIGH — dosing error risk (1.7× overdose if 850mg taken)
Regulatory Flag	Yes — Market Withdrawal / Recall consideration
Suggested Action	Immediate recall initiation + CDSCO notification

5. Regulatory & Action Notes

- Entire batch MET240203 to be quarantined across all distribution channels.
- Root cause investigation: label artwork approval process to be reviewed.
- Distribution list required to identify all affected outlets.
- CDSCO voluntary recall notification to be filed within 24 hours.
- Internal deviation report to be raised in QMS immediately.

This document is auto-generated for AIVOA QMS testing. All patient and batch data is fictional.
